

## BMR 49L TopCase Rack

### Contents of Package:

- 1 – 49L TopCase Rack
- 4 – M5 X 20 Stainless Steel Button Head Cap Screws with neoprene washers
- 1 - #3 Hex Allen key
- 1 – Drilling Template

**Ensure the motorcycle is placed on the center stand**

### Tools required for installation:

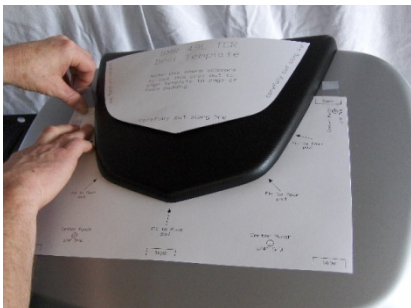

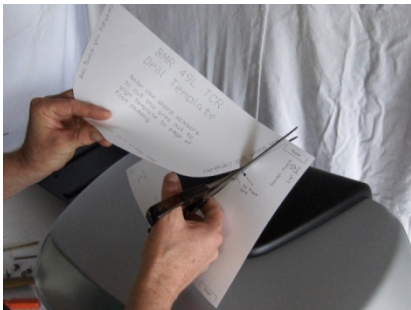

Drill Motor / Center Punch / Hammer / 1/8 in Drill / 1/4 in Drill / Scissors / Scotch Tape

**Note:** You can install the BMR TopCase Rack to the 49L Top Case with it attached to the motorcycle.

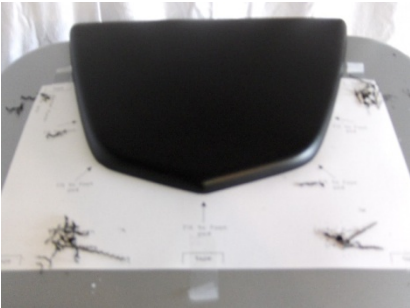

We chose to illustrate the installation process with the 49L Top Case placed on a table.

**Cut out Template / Fit template tightly along black padding / Tape template down where shown.**

**Center punch all 4 hole drilling points / Drill with 1/8 in. drill first, finished with 1/4 in. drill**

It is recommended to drill perpendicular (at 90 deg.) to sloping contour of the case top. Finish with 1/4 in. drill. It is also recommended to "ream" the finished hole by rotating your drill motor with a few 360deg. Circular rotations. This is called "Cleaning the hole".

**Remove Drill Template / Open Case top / Push 1 of the M5-20 Allen screws up thru top of case /****Align matching leg with Allen screw / loosely thread each leg / Finish with Allen key / Tighten screws**

Now that you are done, remember to use the BMR TopCase Rack safely and sensibly. We recommend you load heavier items in the 49L Top Case Luggage Box. We recommend no more than 15lbs. additional weight on top of our 49L TopCase Rack. Strapping down your cargo in a safe manor is very important. Our luggage racks are designed with several ports to tie to. Our rubber ribs on top of the rack are designed to hold your cargo from slipping side to side if your cargo is held down tight with superior cargo straps. We endorse Marsee Soft mounted luggage and Helen Twowheels Bags for their superior craftsmanship and functionality. BMR also recommends and sale ROK Straps for their superior design and functionality.
